## **INTRODUCTION**

Based near the mountain bearing its name, which in ancient times signified a place for protection, CANiK® has become a world leading firearm manufacturer in less than a decade. Thanks to its background in manufacturing high grade components for the aerospace industry, CANiK® has been able to develop and produce top of the line striker fired pistols which are the go to choice of over 50 countries around the world. CANiK® firearms have repeatedly proven themselves in accuracy, durability, and reliability tests required to become the service pistols of military and law enforcement agencies across the globe. On the civilian side, the CANiK® brand has proven to be the choice of world champions. Raising the standard for firearms quality is the only acceptable path for CANiK® and with this goal in mind it's clear why our slogan is "Superior Firearms."

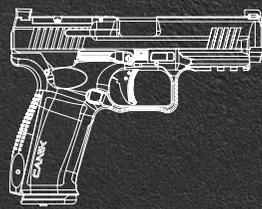

## IDENTIFY YOUR NEEDS AND DETERMINE THE RIGHT PISTOL!

CANiK® pistols come in different frame sizes and barrel lengths, each designed to have the optimal size, weight, range and accuracy balance for different uses. The size classes below are a rough guide to help you find the right Canik pistol for your needs.

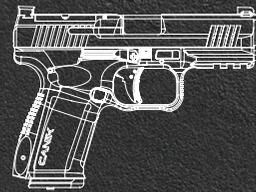

### FULL-SIZE LONG SLIDE

Designed for the ultimate level of accuracy at any range, these pistols are ideal for competition and home protection.

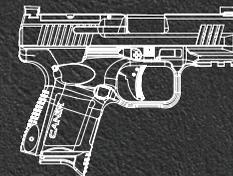

### FULL-SIZE

Built originally to support the specifications of the military and LE communities, this design is tried and true in terms of balance and operational functionality.

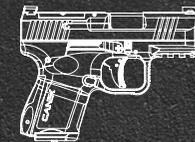

### COMPACT

The definition of a hybrid is the compact. With the barrel length to depend on in terms of accuracy and the size to conceal, this platform is a win for everything from the duty pistol to the concealable platform.

### SUB-COMPACT

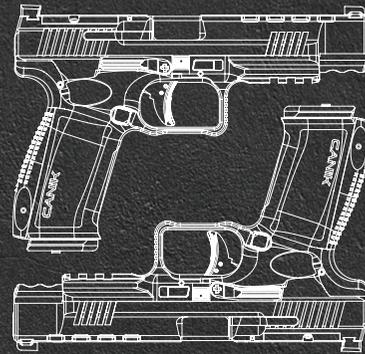

A firearm designed for a government tender challenged to balance size, weight and accuracy while still taking into consideration the values of comfortability and universal usage.

### MICRO - COMPACT

When discretion, dependability, and functionality are everything in a high pressure moment a micro-compact is the only option.

**CANiK**  
SUPERIOR FIREARMS

**PROVIDING SECURITY  
REQUIRES COMMITMENT**

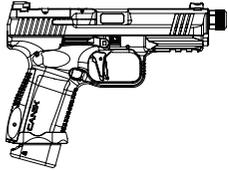

The point of a pistol is simple, when you need it to perform it does. This goal is a universal expectation for everyone from the self-defense owner, to the competitor, and even the professional. This level of dependability is exactly what CANiK® provides with confidence as the result of countless years of time and effort perfecting the brand.

## TP9 SF

Designed with the goal of being the world's superior handgun, after achieving 60,000 rounds it has gained the title. As a firearm capable of participating in the LE, Military, and Civilian worlds, it comes with a great number of improvements over others in the market. Starting with its all FDE Finish and all Black Finish contrast parts, it definitely carries a magnificent, yet elegant look.

## TP9 SF ELITE

TP9 SF Elite is the medium-sized model of the TP Series, having a magazine capacity of 15 rounds. The model is titled 'Elite' due to its ambidextrous slide stop, trigger safety mechanism, Warren type fiber optic sights, and closed striker cover mechanism, as well as its shortened grip size. Its frame design is modified, compared to the previous TP series models, in order to ensure a comfortable experience.

## TP9 SA MOD.2

The smooth-shooting TP9 SA Mod2 is a breakthrough in ergonomics for handguns. A smooth single-action trigger delivers accuracy and fast follow-up shots. Interchangeable backstraps and aggressive serrations ensure that the sculpted grip fits comfortably in your hand for greater control. With its loaded chamber, striker status indicator, and manual decocker/safety lever, TP9 SA Mod2 is everything you desire in a self-defense handgun.

## TP9 ELITE SC

Developed to be the first sub-compact version of the TP Series with its 3.6-inch barrel. The Elite SC offers the same features as the standard TP9 models, while designed for our customers with concealed carry permits. It offers the following features in a sub-compact pistol: comes pre-equipped with double stack magazines, front serrations on the slide, day/night sight with the capability of co-witnessing with Micro Red-Dots.

# METE<sup>SF</sup>

The Canik® Mete SF has arrived! Utilizing the sleek configuration synonymous with the Mete line to include: a integrally flared mag-well, double undercut trigger guard, redesigned beaver tail, aggressive grip texturing, and a modular setup, this concealable pistol is the next step in the Canik® family. With a white dot front site, resting atop the 4.19" barrel, married to a synthetic frame, the Canik Mete SF is ready to back our claim of truly being a superior firearm.

# SFX RIVAL-S

Steel is forged by exposure to the most intense heat and the repeated impact at incredible force, the product of these trials is the strongest and most durable steel in the world. The fire does not consume the metal but rather makes it more flexible and powerful. The blows do not break the metal, instead it actually strengthens the core. Just like forged steel, CANiK® has risen from the forge with strength, power, and flexibility in every area to include its manufacturing and technological departments. It is with the knowledge of these trials that CANiK® introduces the Rival-S, a firearm so forged that it is instantly ready to withstand every rival it is called upon to challenge.

## SFx RIVAL

The Canik SFx Rival has a total length of 8.1", a height of 5.7", a 1.41" width, a 5" barrel, and an overall weight of 29.5 oz. With these specifications the Canik SFx Rival can compete in IDPA, IPSC, and USPSA without restrictions. The Canik Rival is available in Canik Rival Grey with Cerakoted gold accents and in an all-black configuration called the Canik® SFx Rival Dark Side.

## TP9 SFx

The TP9 SFx was developed to serve as the premium version of the TP Series of Pistols with its 5.20-inch barrel. The SFx comes with many new modular features for the shooter to enjoy, mostly for target shooting. This model enhances the shooter's control on the pistol through front serrations and an extended slide; while improving its sight picture with a fiber-optic front sight and a blacked-out rear sight.

## METE SFT PRO

Request for a Canik handgun with style and performance with aggressive new features. The Pro series is ready to move! The Mete SFT Pro series is available with a 5.00" (127mm) barrel. It features an aggressively cut slide that not only adds style but also makes the platform much more easily manipulated. Another noticeable upgrade is the chrome-plated, fluted, 1/2x28 threaded barrel.

## METE SFx PRO

Request for a Canik handgun with style and performance with aggressive new features. The Pro series is ready to move! The Mete SFx Pro series is available with a 5.74" (146mm) barrel. It features an aggressively cut slide that not only adds style but also makes the platform much more easily manipulated. Another noticeable upgrade is the chrome-plated, fluted, 1/2x28 threaded barrel.

## TACTICAL

When professionals across the globe need a pistol, they turn to Canik® for dependability in extreme hot and cold weather, dirty, sandy, and dusty environments, all METE family pistols are expected to meet the highest standards in terms of reliability, durability and accuracy. Therefore, all pistols come with external Tenifer® or Cerakote® over Tenifer® finish, and in addition have their internal firing components nickel plated to ensure smooth operation, corrosion resistance and durability with a service life of well above of 60.000 rounds. Moreover, METE family pistol members are designed and produced to display an exceptional level accuracy with less than 10 cm of bullet dispersion at 25 meters.

All METE pistols are equipped with picatinny rail (Mil-Std-1913) and micro red-dot interface with co-witness feature on the slide to be able to carry various accessories to meet changing operational requirements and different operator preferences. All METE pistols can be installed with a mag-well to allow faster reloading and improve the grip. Even though they come in different sizes, METE family pistols are fully ambidextrous, all have a common trigger weight, same trigger to grip distance, trigger travel distance and reset distance as well as slide and magazine catches positioned in the same place, allowing the shooters to transition easily between different models without impairing their pistol handling and shooting techniques.

- Designed for Competition, Duty Firearms and Carry-Size Pistols.
- Automatic brightness adjustment through a Light Sensor
- Turns ON/OFF automatically through its Motion Sensor
- Because of its high quality SUPER LED, it has a clearer dot compared to its competitors
- Low-Profile Design allows for Co-Witnessing with your favorite Iron Sights
- Comes pre-zeroed out of the factory for METE series pistols.
- Parallax free

### Features

- 3 MOA Red dot sight
- It was Designed for Target Shooting, Self Defense, Home Defense and Hunting
- Manual Adjustments with 10 brightness settings
- Because of its high quality SUPER LED, it has a clearer dot compared to its competitors
- Wide optical lens, for better target acquisition
- Parallax-free

A pistol optic's primary purpose is to provide fast target acquisition with a reasonable rate of accuracy by allowing the shooter to maintain focus on the target while aiming. The MECANIK MO3 Competition Reflex Sight was designed alongside Professional Target and Competition Shooters to provide optimal performance for Target Shooting, Self Defense, Home Defense and Hunting. It is equipped with high-tech features that will crown its unique patented exterior design.

The MECANIK MO3 Competition Reflex Sight TCF (Tactical Concave Face) allows the user the capability of manipulating the slide through the red dot, without touching the reflex glass. This feature further enhances its usability by allowing the slide to be racked against your waistband, while manipulating the firearm with one hand.

The MECANIK MO3 Competition Reflex Sight features a 6 MOA red dot, an ideal dot size for Competition, Target Shooting, Self Defense, Home Defense and Hunting. The MO3 is equipped with a user friendly manual interface allowing for increase or decrease in brightness of the red dot. Due to the high-tech Motion Sensor in the optic, the battery life is preserved when the optic is not in use. Its Light Sensor automatically adjusts the brightness of the red dot, in order to match ambient light and maintain visibility. MECANIK is proud to give you the most efficient, reliable, and robust electronic sighting system in the world.

## MECANIK® MO3 (Competition Reflex Sight)
